# VIPER™ II

Brandenburg (UK) Ltd has developed Viper™ II to offer insect control for commercial premises, which require efficient products at a competitive price.

The new Viper™ II range has been designed and built to the highest standards and all units carry international safety certification.

All models are fitted with two 15 Watt UVA lamps, which ensure optimum attraction to flying insects.

Once attracted to the unit the insect is hygienically and securely trapped onto a glue board, or in the case of the high voltage model, electrocuted and safely collected in the deep catch tray.

New Viper™ II has been made easier to service, can be either wall mounted, ceiling suspended or free standing and is available as a HV Killer or Catcher unit with an IEC or \*Hard wired connection upon request.

## APPLICATIONS

[Shops](#) | [Take-Aways](#) | [Kitchens](#) | [Hotels](#) | [Bakeries](#) | [Supermarkets](#)

## FEATURES
